## 10BaseT Ethernet testing services

This page, hosted by the University of New Hampshire's Interoperability Lab, contains links to service overviews, registration information, newsletters, and technical and educational information.

## Fast Ethernet design rules

This page details the procedures for designing a Fast Ethernet (100 Base-TX, 100 Base-FX) network.

## Quick reference guide to 10 Mbps Ethernet

Offers a collection of documents describing the Ethernet system and the many varieties of 10-Mbps Ethernet media.

# 10BaseT

Last modified: Monday, May 18, 1998

One of several adaptations of the Ethernet (IEEE 802.3) standard for Local Area Networks (LANs). The 10Base-T standard (also called *Twisted Pair Ethernet*) uses a twisted-pair cable with maximum lengths of 100 meters. The cable is thinner and more flexible than the coaxial cable used for the 10Base-2 or 10Base-5 standards.

Cables in the 10Base-T system connect with RJ-45 connectors. A star topology is common with 12 or more computers connected directly to a hub or concentrator.

The 10Base-T system operates at 10 Mbps and uses baseband transmission methods.

•[E-mail this definition to a colleague](#)•
